- JIRA, Miro, Trello

LANGUAGES

- English: Intermediate
- Spanish: Native

PROFILE

Passionate about building web applications that solve real business problems. My background as a Product Owner in fintech gives me a strong understanding of user needs, secure systems, and data-intensive processes. I work with modern stacks like React, Node.js, and TypeScript to deliver functional, scalable, and maintainable solutions. I'm currently seeking opportunities to contribute as a developer in a product-driven environment.

WORK EXPERIENCE

- **InvertirOnline SAU** *October 2022 - Present*
Ssr Product Owner
Defined and prioritized product features based on user feedback and business goals. Collaborated closely with dev teams to deliver new functionality in fintech and crypto environments.
Applied data-driven decision-making using dashboards and KPIs.
Gained technical expertise that inspired my transition to full-time development.
- **InvertirOnline SAU** *October 2021 - October 2022*
Operations Backoffice Team Leader
Monitorized the proper execution and development of daily operations. Synchronized and supported the team to achieve tasks and objectives.
Automated processes for increased efficiency.
- **InvertirOnline SAU** *January 2020 - September 2021*
Operations Backoffice Analyst
Trades and transactions settlement.
Daily cash flow management and reconciliation of positions versus market.
Processed domestic and international securities transfers.
- **Cencosud SA** *August 2017 - November 2019*
Accounting and Asset Valuation Analyst
Cost accounting analysis.
Valued fixed assets and recording depreciation.
Applied international accounting standards.
